EN Thanks to its multiple modular configurations, its variety of models and its sparkling, festive presence, Hope represents the quintessence of the decorative lamp in the age of dematerialization: a lightweight aggregation of technological parts. Created as a contemporary reinterpretation of the classic chandelier, whose crystals are transformed into petals, Hope now comes in a range of new versions, offering the same dramatic, evocative lighting effects.

IT Nelle sue molteplici configurazioni modulari, nella sua varietà di declinazioni tipologiche, nella sua sfavillante e festosa presenza, Hope rappresenta la quintessenza della lampada decorativa nell'era della smaterializzazione: componibile, leggera e tecnologica. Nata come rivisitazione in chiave attuale del classico lampadario, le cui gocce si sono trasformate in petali, è stata poi declinata in nuove versioni, altrettanto suggestive in quanto a effetto luminoso e scenografico.

DE Mit ihren zahlreichen modularen Konfigurationsmöglichkeiten, ihren verschiedenen Versionen, ihrer blitzenden, feuchten Gegenwart ist Hope die Quintessenz einer dekorativen Leuchte im Zeitalter der Entmaterialisierung: unterschiedlich komponierbar, leicht und technologisch. Zunächst entstanden als moderne Neuinterpretation des klassischen Kronleuchters, dessen Kristalltropfen nun die Form von Blütenblättern haben, wurde sie anschließend zu hinsichtlich Leuchteffekt und szenischer Wirkung ebenso beeindruckenden neuen Versionen weiterentwickelt.

FR Grâce à ses nombreuses configurations modulaires, à sa variété de typologies, à sa présence étincelante et joyeuse, Hope représente la quintessence de la lampe décorative à l'époque de la dématérialisation: composable, légère et technologique. Née comme la réinterprétation actuelle du luminaire classique, dont les gouttes se sont transformées en pétales, elle a ensuite été déclinée dans de nouvelles versions, tout aussi suggestives en termes d'effet lumineux et scénographique.

ES En sus múltiples configuraciones modulares, su variedad de tipologías y su chispeante y festiva presencia, Hope representa la quintaesencia de la lámpara decorativa en la era de la desmaterialización: apta para la creación de distintas composiciones, ligera y tecnológica. Nacida como recuperación en clave actual de la clásica araña, cuyas lágrimas se han transformado en pétalos, ha sido posteriormente desarrollada en nuevas versiones, no menos sugerentes en cuanto a efecto luminoso y escenográfico.
