

The background image shows a spacious, modern lounge or living area. A large, multi-paned skylight dominates the upper half of the frame, allowing natural light to flood the space. The skylight's frame is made of dark, intersecting lines. Below the skylight, a large, dark-colored sectional sofa is positioned on the left. In front of the sofa, there are several cylindrical ottomans and a small, round coffee table. A checkered rug is partially visible under the ottomans. To the right, a dining table with a white tablecloth and chairs is partially visible. The floor is a light, polished material. The view through the large windows and skylight shows a cityscape with various buildings, a green field, and a clear sky with some clouds. The overall atmosphere is bright and airy.

Our expansion

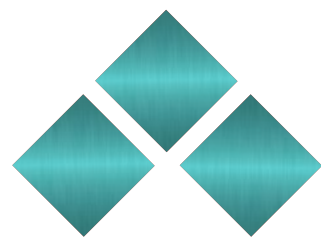

Creative visions

Molteni Vernici riscopre la sua arte e la dona al mondo. Lo fa attraverso nuove scoperte e creazioni che derivano dall'armoniosa fusione della chimica e della fisica più avanzate da un lato e dalla rivisitazione della tradizione più radicata.

Ecco che nasce Anodyc, la rivoluzione del vero Design.

Molteni Vernici rediscovers its art and gives it to the world. It does it through new discoveries and creations, which come from the harmonious fusion and union of the most advanced chemistry and physics from one side and the revisiting of the most rooted tradition from the other.

Here comes to life Anodyc, the revolution of the real Design.

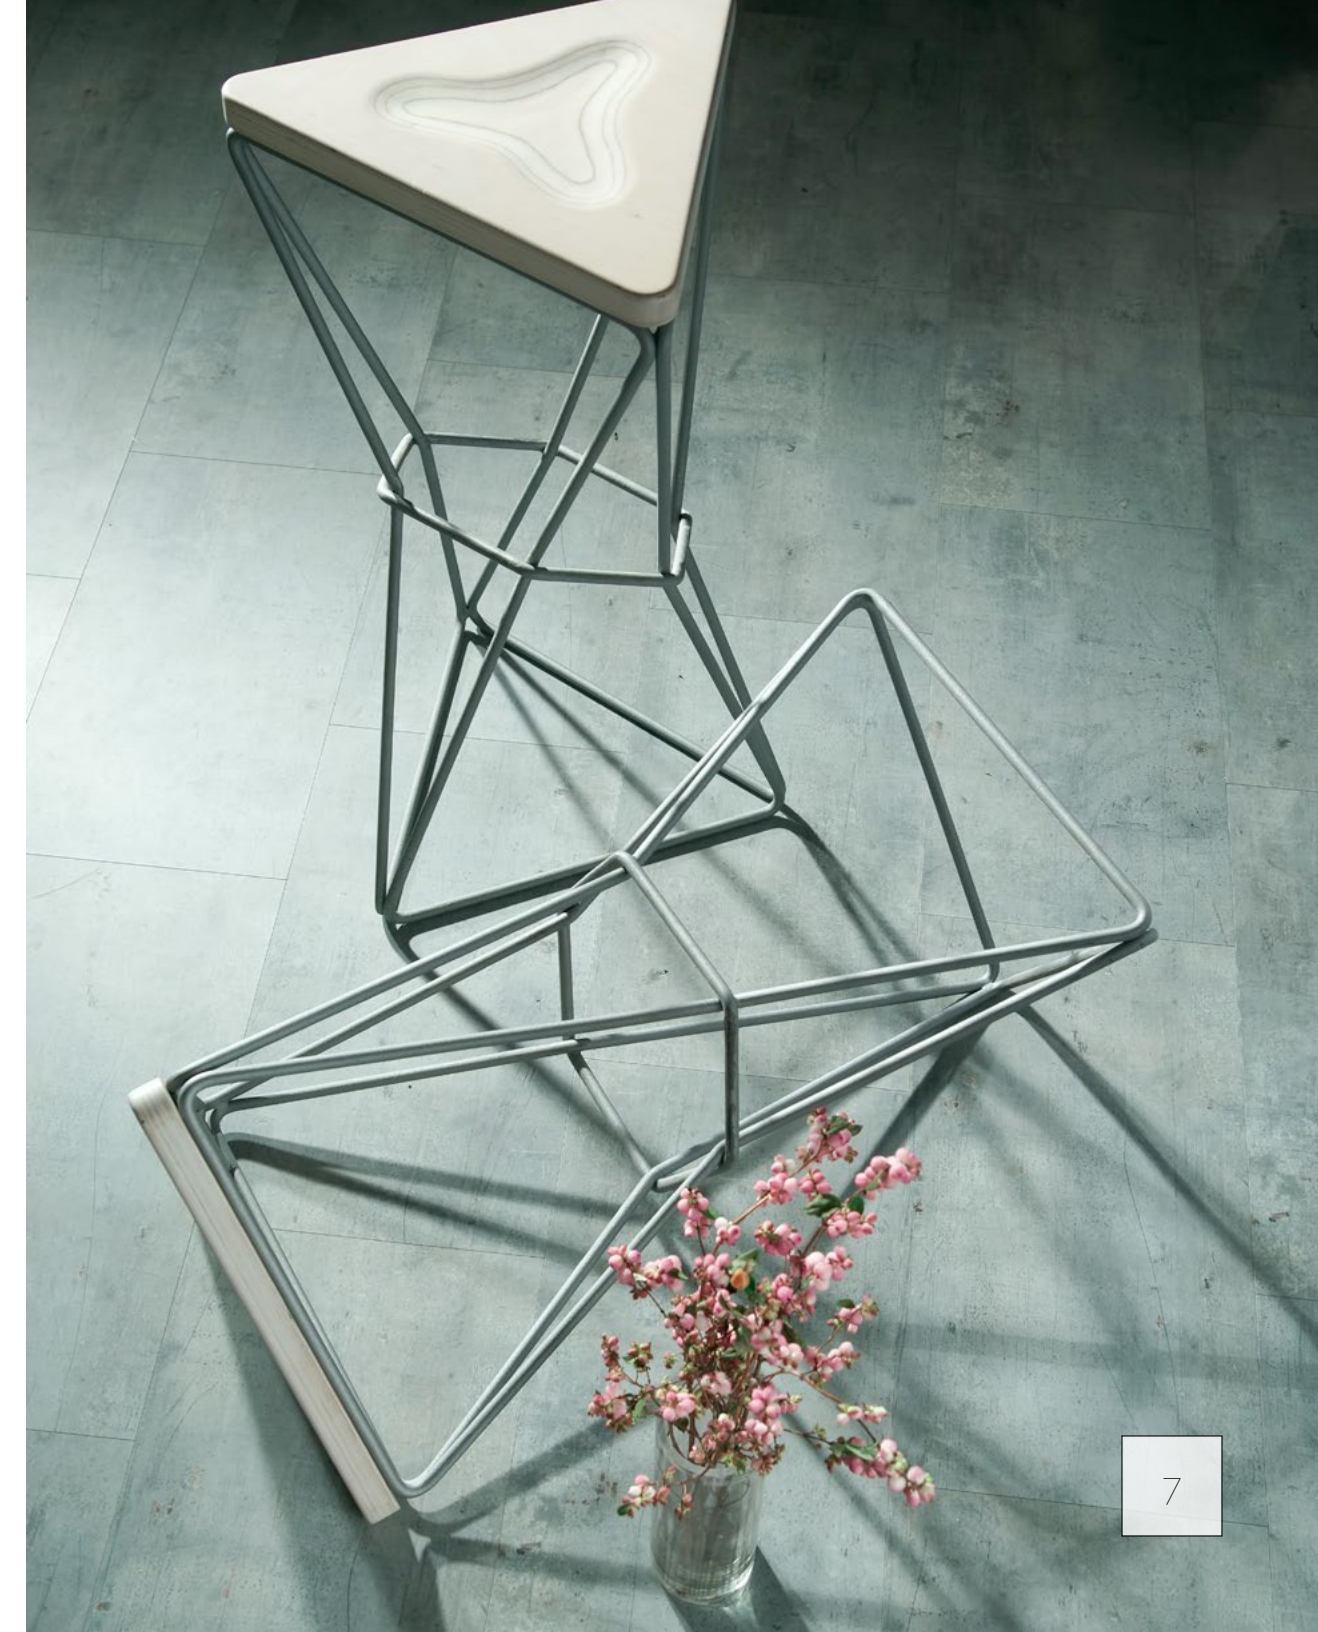

The Purest Design

◆ Harmonious Collection

Anodyc rappresenta la prima serie di vernici e finiture speciali firmate Molteni Vernici, in grado di imitare perfettamente il risultato unico e sorprendente che deriva dal più tradizionale processo di anodizzazione elettrolitica, rivoluzionando in questo modo sia il mondo dell'industria che il mondo dell'architettura e del design.

Anodyc represents the first series of special finishings created in exclusive from Molteni Vernici, finishings which reproduce in an unique way the surprising result of the most traditional process of electrolytic anodization, with a strong revolution both in the world of industry and in the world of architecture.

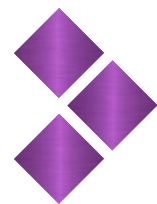

Modern Tradition

◆ Technical Beauty

Linea di prodotti monocomponenti ibridi mano unica a finire (in funzione del supporto), la nuova serie Anodyc offre il vantaggio di garantire la massima luminosità e brillantezza al supporto trattato, il mantenimento della colorazione e la continua ripetibilità nel tempo della tinta desiderata. Costi industriali contenuti, un'impressionante bellezza strutturale e un'unicità galvanica sono solo alcune delle caratteristiche più importanti che rendono Anodyc una delle finiture più apprezzate e preziose in tutto il mondo.

Line of one-component hybrid single-coat products, the new series Anodyc offers the advantage of guaranteeing the best brightness to the treated support, the maintenance of the coloration and the continuous repeatability in time of the desired dye. Low industrial costs, a stunning structural beauty and a galvanic uniqueness are just some of the most important characteristics which make Anodyc one of the most precious finishings all around the world.

Architectural Technique

TIPOLOGIA: finitura monocomponente

COPERTURA: coprente

POT-LIFE: 8 ore

APPLICAZIONE: spruzzo

SPESSORE: 20 micron

UGELLO: 1,2/1,5 mm

RESA: 10 mq/kg

PRESSIONE: 5 atm

ESSICCAZIONE: aria 24hr,
forno 60°C 1hr, 120°C 30'

PACKAGING: 5/10/20 kg

SUPPORTI: ferro, alluminio, zama,
ottone, acciaio, leghe metalliche, ABS,
nylon, PA-6, polipropilene, poliuretano
rigido, polimeri complessi, polycarbonato,
polistirolo, fibre composite, legno,
MDF, HDF, multistrato, listellare marino,
melamminico, nobilitato composito,
supporti galvanici (tutti i supporti devono
essere preparati con gli appositi primer).

TYPE: one-component finishing

COVERING: covering

POT-LIFE: 8 hours

APPLICATION: by spraying

THICKNESS: 20 microns

NOZZLE: 1,2/1,5 mm

YIELD: 10 sm/kg

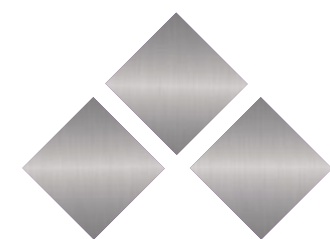

PRESSION: 5 atm

DRYING: air 24hrs,
oven 60°C 1hr, 120°C 30'

PACKAGING: 5/10/20 kg

SUPPORTS: iron, aluminium, zama,
brass, steel, metal alloys, ABS, nylon,
PA-6, polypropylene, rigid polyurethane,
complex polymers, polycarbonate,
polystyrene, composite fibers, wood,
MDF, HDF, plywood, marine plywood,
melamine, composite nobilitate, galvanic
supports (all supports shall be prepared
with specific primers).

Precious
Colors

Colori metallici, armonia di forme e linee, danno luogo al Design più esclusivo.
Metal colors, harmony of shapes and lines, give life to the most exclusive Design.
